

Pond Life April 2 - 13

Children are introduced to different animals and the different habitats in which they live throughout the school year. This unit will introduce the children to a few of the animals who make their homes at or near the pond. The children will also learn about the physical environment of a pond.

Birds April 16 - 27

Children are introduced to many of the animals of our world throughout their preschool experience; this lesson introduces the children to “birds in our world.” The children should learn new vocabulary related to birds, be able to talk about the different kinds of birds. The homes of birds, what birds eat, and how birds get from place to place.
